Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claim 3 in the reply filed on 09/16/2004 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"said barcode" lacks antecedent basis.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yeung 6,101,487.

Yeung '487 discloses a method for determining the accuracy of mail pieces prepared by a bulk mailer per claimed invention. Yeung '487 method comprises the step of providing a unique barcode on a mail piece. The method comprises generating an electronic manifest of said bar code. The method comprises sending and notifying to

a mailing facility said electronic manifest. The method comprises scanning the barcode at the mailing facility and comparing said scanned information with the received electronic manifest. The method comprises generating a report based on the comparing step to list exceptions and variances. The method comprises enabling access to said report. However, Yeung '487 is silent as to the specifics of the barcode identifying the weight of the mail piece, mailing fees for the mail piece, and spatial location of the mail piece within the bulk shipment.

Per Applicant's specification, the barcode containing the weight of the mail piece, mailing fees for the mail piece, and spatial location of the mail piece within the bulk shipment is a commonly well-known standard according to United States postal system.

Therefore, it would have been obvious for a person with ordinary skill in the art, at the time the invention was made, to have provided the United States postal standard barcode to Yeung '487 mail piece because it standardizes the barcoding of Yeung '487 mail piece according to United States Postal standards.

Conclusion

6. Additional references made of record and not relied upon are considered to be of interest to applicant's disclosure: see attached USPTO Form 892.
